

**Associazione NET** piloting courses in Italy started back to back within the first months of 2017 and they involved a total of 30 people coming from 3 different continents: Africa (Cameroon, Senegal and Congo Republic), Asia (China) and Europe (Moldavia, Romania, Albania).

For us it has been a great and interesting experience having the chance to meet all of them from the very beginning.

**VOLCANO** project courses lasted 6 weeks and were very successful thanks to courses conductors initial great job regarding personal and vocational motivation and also self-esteem and self-efficacy in the group!

Subjects taught also concerned Italian language area, person health and care area, vocational orientation preparatory for the work placement.

Participants were enthusiastic about the two

proposed courses and they are now getting ready for the stage phase, included in the project.
